RE: **Hydro Extruder, LLC – Mountain Top Division**
2018 First Half Semi-Annual Pretreatment Report

Dear Mr. Stuart:

As a follow up to the telephone conversation you had with Kara Humes, Entech and on behalf of Hydro Extruder, LLC, this letter is to inform you that the 2018 First Half Semi-Annual Pretreatment Report will be submitted no later than August 13, 2018. As discussed, the contract laboratory missed sampling for Cr, Zn, Cu and O&G during the first half of 2018. This was discovered as the Pretreatment Report was being prepared and the laboratory immediately scheduled to collect the sample for analysis of the missing parameters. Samples were collected on July 26, 2018 and the analytical results are being expedited. Upon receipt of the analytical results we will submit a complete report to your office.

If you have any questions or require additional information, please do not hesitate to call me.

Sincerely,

A handwritten signature in black ink, appearing to read "Thomas J. Avenoso". The signature is stylized with a large, looped "T" and a long, sweeping underline.

Thomas J. Avenoso
Environmental Specialist
